

moodverse

Classify the emotional tone of lyrics, quotes, or any text.

Every song carries a feeling.

We built a model that reads the emotion in text. Try pasting a lyric or a quote, and it tells you the mood.

happy

sad

angry

relaxed

How it works

1

Input

Paste lyrics or a quote or look up a song by title

2

Analyze

Two models read the text: a TF-IDF baseline and BERT

3

Classify

Get a predicted mood with a confidence score

What we built

2,000+

labeled songs from
the MoodyLyrics dataset

2 models

TF-IDF baseline
+ fine-tuned BERT

Live app

React frontend
+ FastAPI backend

57% accuracy → **and that's the interesting part.**

Emotions in lyrics are genuinely ambiguous → "sad" blends into "romantic" and "nostalgic."

A small dataset and imbalanced moods make the subtle ones hard to learn.
